

OneKey Virtual Care, a family-owned, veteran-operated business founded in Ohio, is the affordable, accessible, and reliable solution to maintaining safety and independence in your home or for your loved one. We developed it to empower clients, families and their care providers with data and peace of mind.

We offer two services:

OneKey Monitoring as low as \$6 an hour & OneKey Check-ins as low as \$6 A DAY!

Our product works by installing a system of motion-sensored cameras through a cellular connection (no wifi needed) monitored by live, remote virtual caregivers at hours you choose. When an event occurs, the client's customized care plan is enacted, which may ask that OneKey contact a family member, a neighbor, have EMS sent, or have a caregiver dispatched.

For our monitoring service, we share a detailed report with the daily habits (such as sleeping, bathroom visits, and ambulating) that can be shared with physicians to identify possible infections, medication adjustment needs, and overall health changes. Through our reports, we have been able to identify symptoms of urinary tract infections before families or doctors!

For our check-in service, our virtual caregiver checks in on your loved one at set times during the day and records their location, or enacts the care plan if they are not visible, have fallen, or may need assistance. The client receives a summary of activities weekly.
